## Inventory

## Inventory of MNOK 779 (MNOK 554)

- Planned inventory increase driven by
- New stores and expanded store sizes
- Expanded product and category assortment
- Seasonal inventory level in Q2 last year was lower than desired
- MNOK 60 of the inventory increase due to earlier inventory recognition of goods in transit compared to last year (no cash effect)
- Inventory affected by discrepancies in the value chain
- Increased freight costs
- Earlier placement of orders due to uncertain delivery times
- A healthy inventory with limited obsolesce and high inventory turn-over. Seasonal products accounting for $20 \%$ of inventory, remaining $80 \%$ is all-year products
- We expect a inventory build-down towards a more normalized level during coming quarters. More comfortable with delivery schedules and precision this autumn
